PROFESSIONAL PROFILE

Flutter developer focused on cross-platform mobile, desktop, and retail applications. Experienced in building app interfaces, managing state with Riverpod and BLoC, integrating APIs and business systems, and preparing customer-ready releases for Android, iOS, and Windows. Additional experience with C#, .NET MAUI, Python, web technologies, and relational databases.

TECHNICAL SKILLS

Flutter & Mobile: Flutter, Dart, Riverpod, BLoC, cross-platform app development, offline-first apps, POS workflows.

Platforms: Android (APK/AAB), iOS (IPA), Windows (EXE), app packaging and release preparation.

Languages & Frameworks: C#, .NET MAUI, Python, JavaScript, HTML, CSS, PHP, Laravel, Vue.js, React.

Databases & Integration: PostgreSQL, SQL Server, MySQL, SQLite, SQL, REST APIs, gRPC, JSON, device integration.

Tools: Git, GitHub, Android Studio, Xcode, Figma.

PROFESSIONAL EXPERIENCE

C.A Solution Co., Ltd. | Enterprise Application Specialist

2026 - Present

- Develop C# self-checkout applications for retail checkout operations and integrate cash recycler machines with checkout software.
- Connect applications to APIs and business systems to support integrated workflows.
- Build LLM-powered features in C# for enterprise applications.
- Develop offline-capable Flutter POS software for customer use; prepare Windows (.exe) and Android (.apk) release builds.

AIS Education | Freelance Web Developer

Freelance

- Develop a new website in PHP, including a redesigned user interface and supporting site functionality; the project is in development.
- Manage the website database and its supporting data structure.

Start up Ecomerc Technology | Flutter Developer Intern

2025 - 2026

- Developed a cross-platform mobile frontend with Flutter and Dart; managed application state and optimized UI components for smooth user workflows and performance.
- Built, configured, and packaged production-ready release binaries for iOS (.ipa) and Android (.aab).
- Contribute to DriverX, an ongoing project developed with Flutter.

SELECTED PROJECTS

Restaurant Management System: Designed and developed an object-oriented Python desktop application with a PyQt6 interface for restaurant operations, orders, and menus. Integrated SQLite/MySQL for real-time inventory and customer order tracking.

School Management Web Project: school-management-one-dun.vercel.app. Mart and Cafe POS tools: Google Apps Script and Google Sheets for data storage.

EDUCATION & LANGUAGES

Bachelor of Computer Science, University of Technology and Entrepreneurship (2025 - Present). Khmer and English.
